**The Major Operating Revenue variances against the budget are:**

**Certain Revenue by source and Expenditure by type categories are showing excessive negative and/or positive variances. This is due to fact that the YTD budgets were all systematically determined on a straight-line basis by dividing the total budget per category by 12. The capital projections were also done in the same fashion. Please note that variances within a 10% range are acceptable and need not necessarily be explained**

**The Major Revenue variances (+10%) against the YTD budget are:**

**Exchange Revenue**

- **Service Charges – Water** and Sanitation – Unfavorable variance of R6 240 (-17%)million, tariffs for water and sanitation are linked. The unfavorable variances are mainly due to non-functional meters, which prevent actual readings and require the use of estimated consumption. In addition, credits applied to consumer accounts have contributed to these variances.
- **Interest earned from Receivables** -Favorable Variance of R1 229 million (26%) The increase is as a result of debtor's book that is increasing due to non-payment of consumer accounts.
- **Interest from Current and non-current Assets**- Unfavorable Variance of R4 094 million (-52%) This is mainly due to the Municipality not investing as much cash as initially anticipated. The reduced level of investment was a result of ongoing financial constraints and cash flow pressures, which required the Municipality to retain available funds to meet operational commitments and service delivery obligations.
- **Rental from fixed assets** - Favorable variances of R442 Thousand (22%) This over-collection is mainly attributable to the opening of a new rental account during the financial year.
- **Operational Revenue**- Unfavorable Variance of R27 377 million (-72%). The low revenue collection from land disposal during the period is mainly due to delays in the sale and transfer of municipal land. Several contributing factors have impacted the ability to generate the budgeted revenue from land transactions.

**Non-exchange Revenue.**

- **Fines, penalties, and forfeits**- Unfavorable variance of R5 492 million (-74%) due under recovery of fines: law enforcement
- **Transfer and Subsidies Operational**- Favorable variance of R66 584 million (32%) The higher-than-budgeted revenue from conditional grants during the period is due to the receipt 2nd tranche from the National Treasury than initially projected.

**The Major Operating Expenditure variances against the YTD budget are:**

- **Employee Related Costs**- Unfavorable variance of R17 658 million (8%). The actuals year-to-date expenditure on salaries is higher than the year-to-date budgeted amount. This variance is mainly due to the budgeting methodology applied, whereby the annual salary budget per category was systematically spread on a straight-line basis by dividing the total budget by twelve months. In practice, salary expenditure is not incurred evenly throughout the year, as a significant number of employees receive once-off payments such as annual bonuses during specific months, particularly in July, August, and December. The payment of these bonuses during the first half of the financial year resulted in higher actual expenditure when compared to the evenly phased YTD budget, leading to an apparent overspending.

- **Acting Allowances** – Several acting appointments were made during the period to ensure continuity of operations. However, the associated acting allowances were not included in the original budget, contributing to the overspend.
  - **Standby and Overtime Payments** – Expenditure on standby and overtime has exceeded projections. These costs were higher than anticipated and have placed additional pressure on the salary budget.
  - An increase in employer and employee medical aid contributions resulting from employees adding additional dependants to their medical aid schemes during the financial year. These additional medical aid members were not factored into the original budget assumptions.
- **Inventory consumed** – The actual expenditure on Inventory Consumed for the period is lower than the budgeted amount by R8 367 million, representing a variance of -37%. This underspending is mainly attributable to cost containment measures implemented by the Municipality as a result of ongoing financial constraints. The Municipality limited the issuing and consumption of store items to essential and priority activities only, with non-critical usage deferred where possible. This controlled approach to inventory utilization contributed to reduced expenditure during the period under review. Management will continue to monitor inventory consumption closely to ensure that spending remains within available financial resources while maintaining critical service delivery.
  - **Debt impairments** - Favourable variance of R10 125 million (100%) It should be noted that this is an accounting entry and it is normally done at the end of the financial year.
  - **Depreciation and Amortization** - Unfavorable variance of R15 119 million (29%) due to depreciation being calculated and captured monthly based on the asset register, which reflects the current value and useful life of all assets.
  - **Irrecoverable debts**- Unfavourable variance of R2 099 million (379%) It should be noted that this is an accounting entry and is based on estimates only.

The Major Capital Expenditure variances against the budget are:

The monthly C-schedule is categorized by municipal vote and functional classification. The YTD Actual on capital expenditure as at end of **March 2026** amounted to **R117 507 million** when compared to the YTD budget of **R97 626 million**.

Please note that the **C5 reporting template of the National Treasury excludes VAT** from all reported amounts. As a result, **all figures presented in the table above are exclusive of VAT**.

- **Finance and Admin / Planning and Development**- This underspending is due to cost containment measures implemented by the Municipality as a result of ongoing financial constraints.
- **Community and Social Services**- Unfavorable variance of R1 182 million (28%). The variance between actuals and budget for the Community and Social Services is primarily due to heavy rainfall.
- **Sports and Recreation**-Unfavorable variance of R1 280 million. Overspending
- **Road Transport – Energy Sources - Water Management - -** Unfavorable variances. The projects expenditure exceeded the initial approved budget due to additional grant funding received during the financial period. An adjustment budget will be prepared and submitted for Council approval in April to formally incorporate the additional grants and align the project expenditure with the revised funding allocation.
